

INFRARED THERMAL CAMERAS

COVID-19 Emergency

To deal with the COVID-19 emergency, HT Instruments has implemented on its infrared thermal cameras the temperature screening function.

From today, *the Temperature Screening function*

- › Measurement in the temperature range 32 ° C ÷ 42 ° C, with an uncertainty margin of ± 0.5 ° C*
- › Setting of alarm conditions on the maximum temperature measurement
- › Alarm condition visible on the display (models THT33 and THT45W)
- › Alarm condition visible and audible on the display (models THT45, THT46, THT60 and THT70)

**It does not replace any certified medical device.*

Models available:

THT70

THT45W

THT60

THT45

THT46

THT33
